SECRET FILES AND ORIGINS

THE JOKER

REAL NAME: Unknown **HEIGHT:** 43mm
EYES: Black **HAIR:** Green
FIRST APPEARANCE: LEGO Batman Set #7782, April 2006

DESCRIPTION: Professional criminal who uses his twisted sense of humor to cause chaos.

ORIGIN: **The Joker** was once a small-time thief called the Red Hood. While trying to escape from **Batman**, he fell into a vat of chemicals. The toxic liquids turned his skin chalk-white, his hair green, and his lips ruby-red. Realizing he looked like a crazed clown, he took the name of **The Joker** and embarked on a career of crime. He's vowed to take **Gotham City** apart brick by brick and rebuild it in his own lunatic image!

METHODS: **The Joker** often bases his crimes around his bizarre sense of humor. His favorite weapon is Joker venom, which leaves his victims laughing helplessly as he makes his getaway.

EQUIPMENT: **The Joker** is an expert at building joke-themed gadgets, each crazier and more dangerous than the last. The latest addition to his arsenal is the Joker-Copter, armed with twin retractable cannons and loaded with grinning, glowing Joker venom bombs. Details of what other surprises it may hide are unclear, as the entire design crew mysteriously disappeared after its completion. Witnesses report seeing the Joker-Copter in the sky above the city, accompanied by the sound of crazy laughter.

STATUS: **The Joker** has escaped from **Arkham Asylum** along with several other archenemies of **Batman**. It's believed they have a master plan to defeat the **Dark Knight**, but there are no clues what it might be.

Follow the adventure on **www.LEGO.com/batman**
